

MICHELLE BELLO VERAMENDI

bellovmmichelle@gmail.com - www.linkedin.com/in/michellebellov - www.michellebv.com

EDUCATION

Master of Science in Computer Science - Montclair State University |
December 2024 - May 2026

- GPA 3.83/4.0

Bachelor of Science in Biology, minor in Bioinformatics - State
University of New York at Plattsburgh | August 2017 – May 2021

- GPA 3.8/4.0

TECHNOLOGIES & TOOLS

- Java
- JavaScript / TypeScript
- Python
- Kotlin
- MySQL
- MongoDB
- HTML / CSS

TECHNICAL TRAINING

Tootie Frootie – Room based Game (*In Progress*)

- Worked in a group project designing and structuring a dynamic React TypeScript interface that manages complex game states and real-time score updates, shifting game logic across multiple users simultaneously.
- Built the Game Logic Service Module to orchestrate the full game lifecycle, including real-time score calculations, automated round transitions, and a voting system for validating user answers.

Cuenta – Financial Tracking Website

- Developed a Jersey backend server in Java (“Contador”) to manage the essential logic for user accounts, budgeting, and financial transactions.
- Designed a structured MySQL database server to securely organize the sensitive user data and maintain a reliable record of all account, transactions, and budgeting activity.
- Built a JavaScript frontend (“Diario”) using a suite of JavaScript libraries and Axios to transform complex data into a highly interactive, user-friendly interface that ensures a smooth experience.

Mise En Plate – Recipe App

- Implemented a Node.js backend server (“mep-backend”) using Express, OAuth2, dotenv, crypto, nodemailer, CORS, bcrypt, passport, and JWT for secure CRUD operations.
- Integrated MongoDB Atlas (NoSQL) to manage all app-related data.
- Created a React frontend app (“mep-frontend”) to display a dynamic and interactive user interface.

WORK EXPERIENCE

Research Technician (*On-site*)

Niethammer Lab at Memorial Sloan Kettering Cancer Center, New York, NY | July 2021- July 2023

- Performed and troubleshooted different biology techniques such as molecular assembly and manipulation of DNA and RNA, bacterial cloning and transformation, protein extraction and western blotting, immunostaining, PCR, quantitative PCR, CRISPR Cas9 gene editing, and transgenesis.
- Established new transgenic and CRISPR knockout zebrafish lines.

Laboratory Technical Assistant (*On-site*)

Adirondack Health, Saranac Lake, NY | December 2020 – May 2021

- Prepared SARS-CoV-2 specimens for PCR testing using the Rheonix Covid-19 Assay.
- Performed maintenance of the Rheonix, troubleshooted, and assessed quality control of results
